The prices quoted are based on release of all quantities of any item in one lot. Shipment will be in two (2) packages. The Blower-Motor Assembly, the Ducting, plus Control Handle would be reassembled by the customer at destination.

T310 welded tubing, 1-1/4 and 1-1/2 Diameter must be procured from the mill with a delivery up to 12 weeks. The mill requires a minimum order, therefore the prices quoted include remnant material in the following amounts:

Item 1	-	approximately	\$ 216.00	per unit
Item 2	-	"	\$ 71.00	" "
Item 3	-	"	\$ 16.00	" "

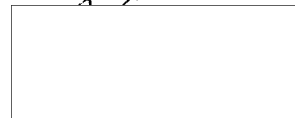

No basic design changes have been included except that parts have been planned for integral fabrication where economical to eliminate weld seams, therefore, this practice allies itself with Solar's forming practice. Before design considerations are finalized for production quantities, Solar would like an opportunity to advise.

There appears to be an inconsistency in the tolerances as shown on the prints. In some instances plus/minus 1/32" would appear permissible, where plus/minus 1/64" is specified. Our quotation is based on the assumption that the greater tolerance would be acceptable.

Terms and Conditions: Terms are net 30 days, f.o.b. Solar, San Diego, California. Prices are subject to applicable federal, state and local taxes.

We will welcome your purchase order for the items quoted, and appreciate this opportunity to be of service to you.

Yours very truly,

Contract Administrator
